AB - Laminated sheets contg. insecticides are prepd. to control domestic insects such as cockroaches and termites. A fibrous material was prepd. from cellulose and polyester fibers. To the surface of this material (3-10 mm thick) was applied a mixt. of H3BO3 60, sucrose 20, flour 18.5, and a flavor 1.0 part by wt. This surface was covered with the same fibrous material and laminated with a 30 .mu.m-thick paper and a 10 .mu.m-thick polyethylene sheet. The combined sheets were passed between compressor rolls at 120-180.degree. to give a laminated sheet. The effectiveness of this sheet (50 .times. 50 mm) in killing cockroaches in a container (300 .times. 390 .times. 210 mm) was
